EXPÉRIMENT 12812AD DESMOSTITUTE SADSTITUTE S	5805, J581, 40.
ADVACED SUB ARRAY PROBLEM You are competing in a basketball contest. In this contest the score for each successful shot depends on both the	, 22812AD
distance of a player from basket for N shots. The index of array represents the position of the player. Score is calc	distance ng the
multiplying the position with the distance from the basket. Your task is to find and return an integer value, representing the maximum possible score you can achieve by choo contiguous subarray of size K from the given array.	osing a
Note:	,
* A subarray is a contiguous part of array.	2817
* Assume 1 based indexing.	5
*The array contains both negative and positive values.	
* The array contains both negative and positive values. * Assume the player is standing on a cartesian plane.	OSAO
Input Format	512AD5AD1
- input1:An integer value N representing the number of shots made by the player - input2 : An integer K representing the size of subarray	
- input2 : An integer K representing the size of subarray	*05 ⁻¹ 2 ²⁸
- input3 : An array of integers	×os
Sample Input 5	~ ⁰
	a Alba
2 1 2345	A STATE OF THE STA
12345 Sample Output	× 94
14	FAPRITY
